

DAX calculation in PowerBi, adding columns for proper calculations.

For AveragePrice

AveragePrice =

```
DIVIDE(  
    [High_Price] + [Low_Price] + [Close_Price],  
    3  
)
```

For ROI

ROI\_Percent =

```
DIVIDE([Monthly_Profit_ZAR], [Starting_Balance_ZAR]) * 100
```
